Edward F. Dibble Seedgrower, Honeoye Falls, N.Y.
January 28, 1936

TERMS NET. NO DISCOUNTS ALLOWED. BAGS AND SACKS FREE AND NOT RETURNABLE.
CASH WITH ORDER. PRICES ARE FREE ON BOARD CARS AT HONEOYE FALLS, N. Y.

Dibble's D. B. Brand Alfalfa, Clover and Grass Seeds are the highest grade obtainable. Average analysis for years has been approximately 99.70% pure and an average of around 99.50% is guaranteed.

Every bag of Dibble's Alfalfa, Clover, Grass and Grain Seeds has a tag showing our Purity and Germination test. They are sold on a ten-day-money-back-if-you-want-it guarantee subject to any test you may choose to make.

Is there a fairer way to sell or a safer way to buy Farm Seeds?

WE QUOTE TO-DAY'S VALUES SUBJECT TO MARKET CHANGES. Samples of any of our seeds on request. In our opinion these prices will be higher later in season. Order now. Shipment March or April 1936.

The Latest on the Farm Seed Situation

The total seed production of Timothy, Alfalfa and the Clovers that was produced in the U. S. last year is given below, and compared with the 1934 production as well as the 1928-32 (5 Year average.) You will note that Alfalfa seed was an average crop; the Clovers were very short and Timothy nearly twice the 5 year average.

ALFALFA:—	}	1935 Production	-	-	49,374,000 lbs.
		1934 Production	-	-	49,242,000 lbs.
		1928-32 (5 year average)	-	-	49,375,000 lbs.
RED CLOVER SEED and ALSIKE CLOVER:—	}	1935 Production	-	-	60,900,000 lbs.
		1934 Production	-	-	65,946,000 lbs.
		1928-32 (5 year average)	-	-	93,785,000 lbs.
SWEET CLOVER:—	}	1935 Production	-	-	33,528,000 lbs.
		1934 Production	-	-	37,566,000 lbs.
		1928-32 (5 year average)	-	-	53,463,000 lbs.
TIMOTHY SEED:—	}	1935 Production	-	-	128,223,000 lbs.
		1934 Production	-	-	11,785,000 lbs.
		1928-32 (5 year average)	-	-	70,194,000 lbs.

Alfalfa prices are firm, Clovers very firm and Timothy steady. With the exception of Timothy, prices on Alfalfa and the Clovers will in all probability work higher.

EDWARD F. DIBBLE SEEDGROWER
HONEOYE FALLS, N. Y.

The Latest on the Farm Seed Situation

SEED OATS:—A very large percentage of the oat crop is very light in weight and of poor quality. As a result, good seed oats are scarce. Seed Laboratories report germination tests of many stocks are far too low. We are fortunate in having a good supply of heavy oats showing good germination.

SEED BARLEY:—The crop this year is a little larger than the five year average, but a large part of this was damaged by unfavorable weather during harvest time. We have only a few thousand bushels of choice seed for our customers.

SEED CORN:—The seed corn situation looks serious. The farther west one goes the more serious it looks. Excessive moisture, lack of sunshine and early freezes have wrought havoc with the seed corn and a large proportion has been rendered worthless for seed. We feel that good seed corn will be scarce by planting time and advise early purchases while our present stock of high germinating seed is available.

SEED POTATOES:—The combined supply of certified seed from Maine, New York, Pennsylvania and Michigan is considerably under that of a year ago. Certified Russets and Smooth Rurals are about 50% short of a year ago and the shortest crop in several years. Prices are at the low point of the year and with the increasing demand for seed, should work slightly upward.

In summary let us say **USE DIBBLE'S SEEDS and PURCHASE YOUR REQUIREMENTS NOW.**
